

**RIGID BODY
PRODUCTION**

ABOUT US & WHAT WE DO

- * We have invested in a new laser cutter that can quickly produce precision parts.
- * Our fully automated Panasonic robotic welder can weld 2 bodies simultaneously.
- * The brake press we purchased can form the body & sub-frame exact to the drawings.
- * We have a large stock of Palfinger cranes, Edbro & Hyva hydraulic rams.
- * Using the latest computer software, all orders are precise to your requirements.
- * Investment in EU WVTA facilities, so there is no delay in getting the vehicle tested.

WHY CHOOSE US:

- * We offer the markets only bolt together sub-frame.
- * Mudwings, sub-frames & underrun bars are fully galvanised.
- * High proportion of the proprietary items are bolt on to ease replacement if damaged.
- * All bodies are shot blasted, primed & finished in a high level 2 pack paint.
- * We have a large range of bodies in stock.

OUR GUARANTEE

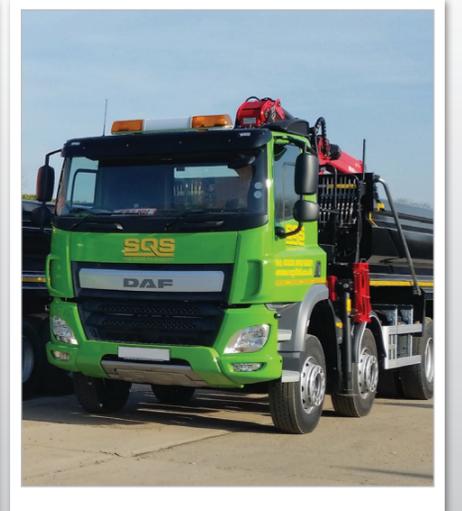

- * 1 Week turn-around from body/chassis arrival.
- * Long warranty on sub-frame.
- * Premium name products fitted.
- * 450 Hardox steel used for our bodies.
- * 4mm sides & 5mm floor, double skin & insulated also available.
- * Competitive tare weights.
